

COMAR P.i ECO RANGE OF WINDOWS AND DOORS

Just like you, each home has its own unique properties. With Comar P.i ECO, its comprehensive range of solutions ensures that each window or door is installed to perfectly fit with your lifestyle.

Comar Architectural Aluminium Systems is a British privately owned company with over 40 years experience. Our Head Office is in Surrey, here we design and distribute British designed fenestration systems through our nationwide Approved Fabricator Network. We know that investing in home improvements is a major decision. Once the decision is made you expect only the best in service and quality. We have rigorously tested the Comar P.i ECO Window & Door System to exceed the requirements of weather and security British Standards. The window and doors are surveyed, fabricated and installed by trained professionals, assuring you of the best in British service and delivery.

*Comar P.i ECO: the range of aluminium windows and doors for the discerning homeowner.*

## Style your Windows & Doors

Your windows will be a combination of fixed and opening sashes, which may be in box or bay configurations.

Comar 5P.i ECO has slim, strong profiles which can cater for all design sizes and configurations, with options for structural bay-poles and the new Comar 5P.i ECO+ range offers increased energy efficiency. To perfectly fit into your home, a wide range of styled aluminium sills are available. Curved oval profiles are available to provide a traditional looking window.

Doors welcome you and your family into your home.

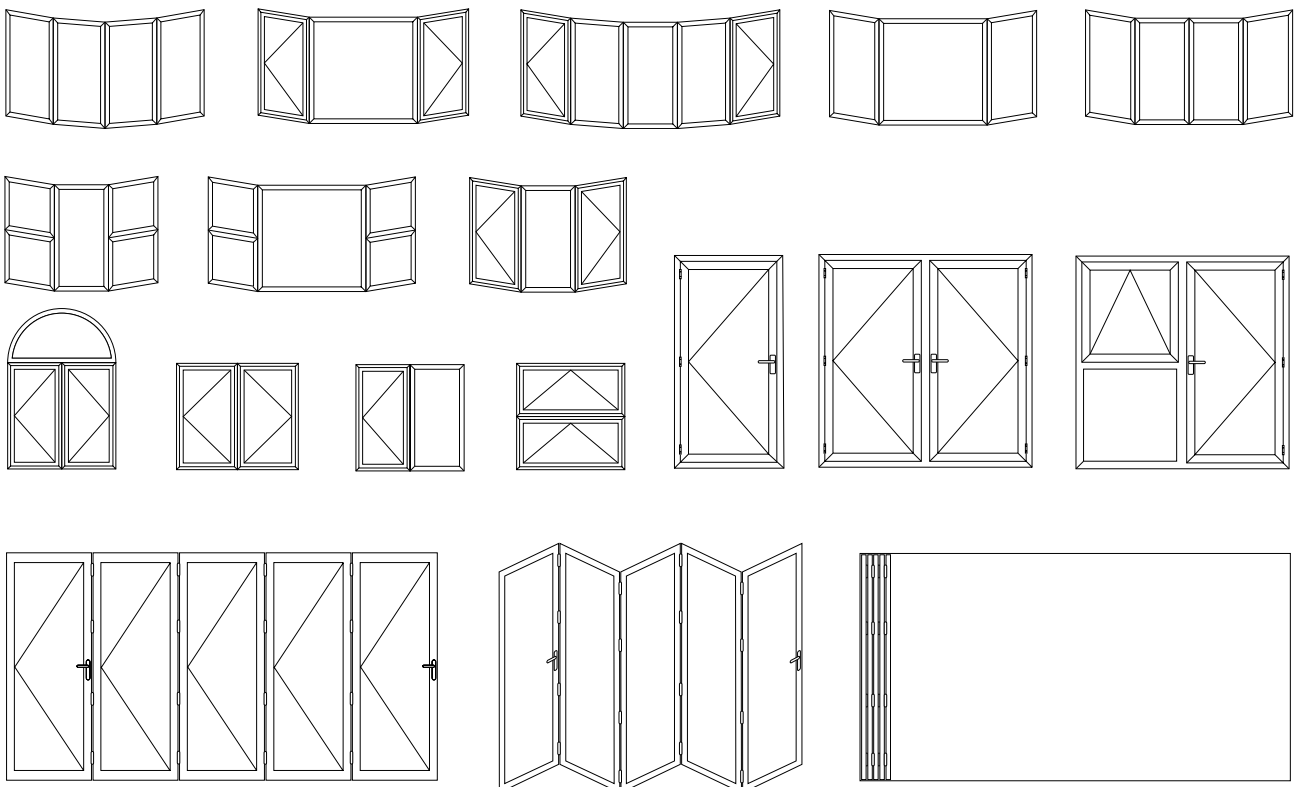

Comar 7P.i ECO Doors provide single and double, open-in and open-out, with options for mid-rails for letter-plates. The doors can be glazed with glass or the panel of your choice.

Our latest addition to our range is the Comar 7P.i Folding Sliding Door which provides a versatile movable wall that allows space and light into any home and with up to 8 doors sliding in either direction you can really bring the outside space into your home.

## Style notes & options

## Investing in Energy Efficiency

Investments in your home need to provide returns now and in the future.

Comar Pi ECO offers confidence with its Pi ECO trade-mark. Pi is Polyamide Insulation which creates energy efficient windows that actively reduce your energy bills, by retaining the heat in the colder months.

Window Energy Ratings (WER's) are also available in a range of performances

from A-C, please discuss this with your Comar Approved Fabricator. As Comar Pi Eco has been specifically designed for the rigours of the British weather, it has exceeded the requirements of the British Standard BS 6375.

the requirements of PAS 24: 2012 enhanced security tests and for additional reassurance Comar hold BSI's Kitemark for enhanced security.

## Investing in Security... ...and Peace of Mind

Household insurance is on the rise and reductions in your premiums can be available by selecting multi-point, shoot-bolt locking. This is backed up by Comar 5Pi ECO windows exceeding

*...your style with hardware  
to suit your colour scheme  
and taste...*

### Operation Ease - A Range of Handle Options

To co-ordinate with your home, all hardware is available in a variety of finishes – bronze, gold, satin chrome, white or we can powder coat to any standard RAL colour. As part of our testing to British Standards the operation of the hardware has been tested for ease of operation to over 20,000 cycles – reassuring you of long-term performance.

### Sustainable Long-term Solutions

Aluminium is the most famous recyclable material, it can be recycled again and again with no loss to its form or function. This creates a bank of useable aluminium for future generations.

In use, aluminium has an almost indefinite life-span and with correct maintenance, a regular wipe with soapy water and hardware adjustments, your windows and doors will perform year-on-year. One of the earliest uses is the famous art deco roof of the Empire State Building which has kept its good looks since 1910.

Unlike other materials Aluminium has high strength-to-weight ratios which means it creates windows and doors with slimmer sightlines letting more light into your home with its discrete framing.
